# Amazing Animals

## Sharks

Sharks are animals that live in the sea. They eat other fish. There are 350 different types of sharks.

## Wolves

Wolves are savage animals that live in the forest and eat meat. They always hunt in herds. They look like dogs.

## Dolphins

Dolphins are mammals that live in the sea. They leave the surface to breathe. They eat fish.

They communicate through whistles, clicks and sounds.

## Crocodiles

Crocodiles are animals that live in rivers. They have a great mouth with which they hunt the prey to eat. Crocodiles move very fast in the water. Their tails are very powerful.

## Buffalos

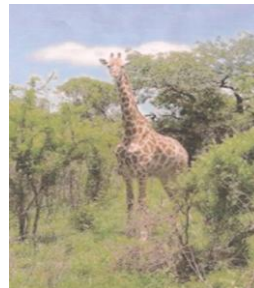

Buffalos are herbivorous animals that live in the fields in America. They are similar to bulls and cows.

## Pumas

Pumas are felines that live in Asia, America and Africa. They have a good sense of hearing and sight.

## Giraffes

Giraffes are very tall animals. They live in forests and eat leaves from trees.

A giraffe's tail is one of the longest in the animal world.

## Tigers

Tigers are animals that live in the forest. They eat animals like zebras.

The tiger in the picture is resting to replenish forces and return to hunt.

Tigers are the largest species of cats.

## Lions

Lions are savage animals. The lion in the picture is running because it is chasing an animal to eat.

They live in prides.

## Bulls

Bulls are mammals. They live in fields and are herbivorous animals.

Bulls are important animals in many ancient cultures.

**Daniel Iglesias Ferrero Y6**

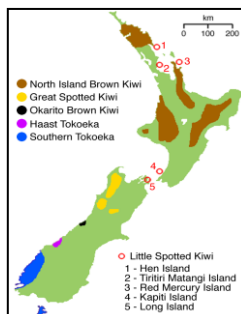

### What is a kiwi?

·A kiwi is a non-flying bird with the size of a hen. Its wings are invisible with the feathers. This species have a spinal cord like mammals. Males incubate the eggs above 10 weeks on subterranean nests but they don't give food to the newborn. Their feathers are bristles of reddish and brown colors. They defend with their paws not with their beak.

They are omnivores; they eat fruit, worms, crabs...

### Where it lives?

·They live on the north of New Zealand on plateaus if there is a wood.

**What is happening to it?** ·The population has decreased 90% above the last century

### What threatens the kiwi?

·The deforestation by the humans. They are eaten by cats, dogs and stoats so only the 6% reaches adulthood. The trapdoors that are used by humans.

### How we can avoid the extinction?

·Reforest their habitat. ·Take of the trapdoors. ·Get protected places. ·Incubate the eggs on incubators and let go the little kiwis when they born.

### Why they don't have to disappear?

·They don't have to disappear because all animals are needed.

### Is it protected?

·Yes, it is a protected animal.

# WWF leaflet

## SAVE THE BROWN BEAR

By Angela. 6° class.

### What is a European Brown Bear?

A European Brown Bear is a mammal of big size, their colour is usually dark brown but it can vary to cream depending on the location of the species. They are omnivorous, they eat grass and shoots in spring, and all the year; roots, insects, mammals, reptiles, and honey.

### Where it lives?

They live in Europe: mostly in mountain woodlands, also in Siberia: forests, and North America: coastlines, alpine meadows, and tundra.

### What happen to them?

Now they are around 200.000, but the specie is in danger of extinction. So, they could disappear if we don't do anything. We have to stop all what threats them.

### What can I do?

- Talk about those problems with other people.
- Help us stopping hunting's.
- Complaint illegal hunters and poachers.
- Ask for a natural reserve for them.

### Why they couldn't disappear?

Because if they disappear the Natural balance will be in danger and we would have lost an animal more.

### What threat the Brown Bear?

- Poachers and Hunters.
- Habitat destruction and persecution, problems that affect populations to different extents across their range.
- Logging, mining and road construction and other, have reduced available bear habitat pushing them to streets and roads, in some cases, in cities.

This is bad.

If you want to know more about the Brown Bear enter in:  
[www.WWF.com](http://www.WWF.com)  
and help us to protect the Brown Bear.

# Help them!

Don't pollute, use less energy,  
and if we do these things,  
we can help them.

## POLAR BEARS

### WHAT IS A POLAR BEAR?

A polar bear is a large, white-furred bear living in Arctic regions. Also called white bear.

### WHERE DOES IT LIVE?

The Polar bear lives primarily on arctic coasts, islands, and adjacent sea ice of Eurasia (Norway & Russia), North America (Alaska, Canada), and Greenland.

### WHY IS IT ENDANGERED?

The predominant reason of polar bears getting closer to becoming endangered is global warming. Global warming has taken a toll on the population numbers of polar bears. Today, polar bears are listed as threatened species under the Endangered Species Act of 1973.

### HOW CAN WE HELP THEM?

We can help polar bears in many ways. For example, by reducing our greenhouse gasses we will prevent global warming from melting the Arctic away. Also recycle more and do other stuff that will prevent global warming.

# ANIMAL RIDDLES

Can you guess the animal described? (Answers on page 23 )

<p><b>It is a wild animal.</b> <b>It is a herbivore.</b> <b>It is viviparous.</b> <b>It is a vertebrate.</b> <b>It has a big tail.</b></p> <p style="text-align: right;">Lucia Y2</p>	<p>It is a vertebrate, viviparous and herbivore. ## Why is the sky blue?

One day a little boy was crying in his bedroom. His mother asked why he was crying. He said that he was very sad because the sky was always white and he couldn't see the clouds. She said that the sky was always white and they only saw the clouds when it rained. His mother asked an old man who lived in her village.

The old man gave the mother a magic bottle and he said that the boy had to look after the bottle for 5 months.

The boy looked after the bottle for 5 months and he didn't break it. When the boy opened the magic bottle millions of little blue stars left the bottle and from that moment on, the sky is full of little blue stars and this is why the sky is blue.

Marco Y5

## WHY TREES GROW

In a land very far away, there were some aliens from the trees, that helped them grow. One day somebody came to cut the trees. They cut down all the trees that were there in the forest, as were the aliens. The aliens had no house, but didn't cry because if they got the dust to grow trees, they would have homes again.

The aliens began to walk to catch the dust. When they saw Paul the king of the powders, they asked him for dust. He answered; "First you have to do two tests, the first test, is to sing for me. The second test is to make a difficult tour." They did the two difficult tests. When they finished the tests, Paul gave them all the dust he had. And every time they cut down the tree, he laid the magic dust and it grew again.

And this is why trees grow!

Andrea A. Y5

## Why Red Apples are Red

Once upon a time, many hundreds of years ago, a queen had white apples in her castle. One day, a little girl jumped into the castle. The little girl's rabbit entered the castle and the alarm went off.

The queen and the king said to her servants to catch the little girl and her rabbit. One of them got a bucket of red paint. The little girl jumped near the apple tree and the servant that got the bucket of paint jumped and the paint got on the apples. The paint was edible and the queen ate one of the apples and said that they were very good. The king and queen said to keep them in the castle for the rest of their lives.

Cristina H. Y5

## Why the snow is white

In a land very far away where the sun was always shining there lived a very unhappy giant. He was sad because he didn't like the hot weather and longed for winter to come to his land. One day he met an angel.

Angels are good and this one especially so she listened to his problems. She told him that she could make winter come if he would help her return to the clouds.

The giant, on tip-toes, lifted the angel and placed her carefully on the nearest cloud. The angel then began to break off little bits which were so cold that they almost froze the air in this land. The giant was delighted and lived happily in a land where snow fell every day.

Miguel Y5

# NATURAL ZAMORA

The nature of Zamora has different strengths. One is a mountainous area in the North where we find the Lake of Sanabria.

Another is in the middle where we find the Arribes of the Duero and the Mountain range of the snake.

Another place is in the plains where we find the Lagoons of Villafafila.

This wolf is found in Sanabria and the Mountain Range of the Snake.

These elks are from the Mountain

Range of the Snake.

This eagle is found in Arribes of the Duero.

This bustard is from the

Lagoons of Villafafila.

We can find much flora and fauna in the Sanabria Lake Natural Park, located Northwest of the Zamora Province, also in the Lagoons of Villafafila and in the Hunting reserve of Sierra de la Culebra. Here are some examples:

Kingfisher

Blue Stag Beetle

Stork

by: Y4

Alexis Rodriguez Alvarez

# Find the Flora

Do you recognise any of these trees or plants?  
The photographs were taken in Riomanzanas School.  
Can you find where?

Photographs by Lara and Claudia 21

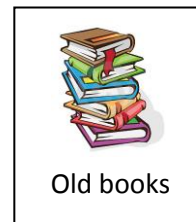

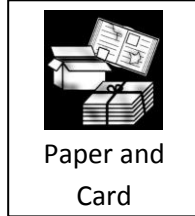

# HOW GREEN ARE YOU?

Esther, Anthya, Sara C., Judith and Mireia in Year 4 used the quiz on the British Council website (<http://learnenglishkids.britishcouncil.org/en/fun-games/how-green-are-you>) to ask the students at Riomanzanas school five questions. Here are their results:

<b>Question 1: Its time to get up. Do you have...</b>		
<p>a. a shower: b.a bath: c.a quick wash:</p>	<p>Esther investigated and discovered most of the school have a quick wash. This pie chart shows that more than half the school have a quick wash, nearly a quarter have a shower an about one sixth have a bath in the morning.</p>	
<b>Question 2: You're ready for school. Do you go....</b>		
<p>a.by car: b.by bike: c.on foot: d.by bus:</p>	<p>Anthya investigated and discovered most children go to school on foot or by car. Few children go by bus and none go to school on foot. This bar chart shows that most of Year 6 go to school on foot, whereas most of Year 4 go to school by car.</p>	
<b>Question 3: It's break time. Do you...</b>		
<p>a. eat sweets or crisps b. eat pre-packaged biscuits or sandwiches c. eat some fresh fruit</p>	<p>Sara investigated and discovered that most people either eat pre-packaged biscuits or sandwiches or they eat fresh fruit. Few people eat sweets or crisps.</p>	
<b>Question 4: What do you do with your rubbish?</b>		
<p>a. throw it on the floor b. throw it in the nearest bin c. throw it in the correct recycling bin</p>	<p>Judith investigated and discovered that most people throw the rubbish in the correct recycling bin especially year 4. Many children in year 2 throw it in the nearest bin.</p>	
<b>Question 5: It's bed time. Do you...</b>		
<p>a. forget to brush your teeth b. leave the tap on while you brush your teeth c. turn off the tap while you brush your teeth</p>	<p>Mireia investigated and discovered that nearly everybody turn off the tap while they brush their teeth. A few forget to brush their teeth!!!</p>	

# Where do we recycle?

Draw lines to put the rubbish in the correct bin.

PARA ENVASES DE VIDRIO    PARA ENVASES DE PLASTICO Y LATAS    PARA ENVASES DE PAPELY CARTON

A diagram showing three recycling bins: a green bin, a yellow bin, and a blue bin. Below each bin is a recycling symbol and a label: 'CONTENEDOR VERDE' (Green Bin), 'CONTENEDOR AMARILLO' (Yellow Bin), and 'CONTENEDOR AZUL' (Blue Bin). Above the bins are three categories of waste: 'PARA ENVASES DE VIDRIO' (For glass containers), 'PARA ENVASES DE PLASTICO Y LATAS' (For plastic and cans), and 'PARA ENVASES DE PAPELY CARTON' (For paper and cardboard). A line is drawn from the 'Glass jar' image to the green bin.

Miriam and Miguel Y4

## Interview with a farmer

Do you recycle at home? Yes

What plants do you grow?

I grow vegetables like tomatoes.

Why do you think that plants are good?

Plants are good because plants give us oxygen.

Natalia Y4

# Green Celebrities

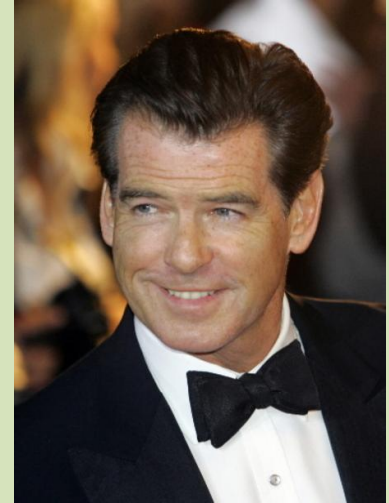

*What do famous people do to help protect our environment and save our planet?*

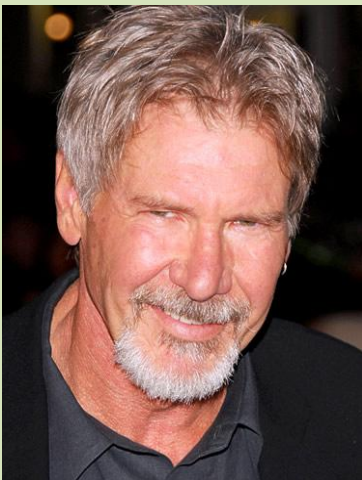

Brad Pitt was a co-creator to design and build 20 affordable uses of energy in environmentally friendly houses of New-Orleans.

Leonardo Di Caprio started a foundation in 1998 to promote environmental issues.

Pierce Brosnan protects mammals like whales and was awarded for it in 1997.

Harrison Ford was awarded the Environmental Citizen Award in 2002.

Barenaked Ladies run their buses and trucks with biodiesel fuel.

Alanis Morissette fights to stop oil drilling in Alaska and has a solar panel in her house.

# BOOK REVIEWS

WE WROTE BOOK REVIEWS ON A COLLECTION OF SCHOOL BOOKS  
FROM A NON FICTION SERIES BY OXFORD READ AND DISCOVER

## All about plants

Julie Penn

This book is a non-fiction type of book and it has an interesting and educational content about plants on earth.

It hasn't any characters but it has many illustrations of food, animals and a world of plants.

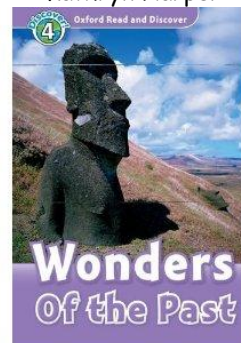

In my opinion, this book is a bit interesting because I like plants.

I recommend this book to people who have a lot of plants.

Reviewed by: **Alexis Y4**

## Wonders of the Past

Kathryn Harper

This book is a non-fiction book. It has an interesting and educational content about wonders of the world.

This book hasn't characters but it has illustrations of many wonders. For example: Petra.

In my opinion, the book is interesting because I like old places.

I recommend the book to people who like to travel.

Reviewed by: **Julen Y4**

## All about desert life

Julie Penn

This book is an information book that talks about life in the desert. For example: What is a desert, different deserts, plants in desert life: The Welwitschia plant or the Baob tree.

The illustrations are so beautiful especially a photo of a lizard in the sun or the photo of the owl with his incredible eyes and colour.

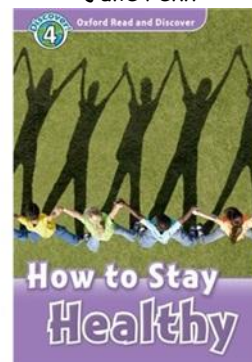

The best part is when it told about animals in the desert because I like animals a lot.

I recommend this book for kids of 7 to 12 years because it's a good book to learn new things, like about 13% of the people who live in deserts.

Reviewed by: **Lara Y4**

## How to stay healthy

Julie Penn

This non-fiction book helps you to stay healthy. To stay healthy we have to do sport, don't eat too much fast food, eat the right foods and eat carbohydrates, fruit and vegetables two days a week.

You have to wash your teeth after every meal because if you don't brush your teeth, in your mouth you are going to have microbes.

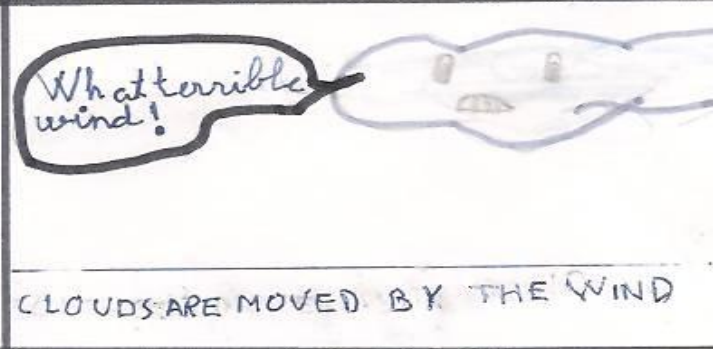

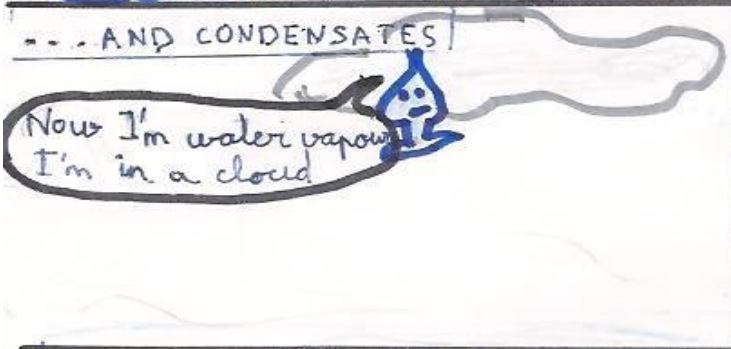

You can do exercise in the park or in the mountains. You have to rest well because if you don't sleep well, your brain can't work well.

I think that the book is excellent because we can learn to stay healthy reading this book.

I recommend it to all the people in the world to stay healthy.

## GREEN ARTS AND CRAFTS

### LOOK AT SOME THINGS YOU CAN DO BY RECYCLING PLASTIC BOTTLES

#### Instructions for making a pencil holder

You need:

A plastic bottle, some sticks (twigs), crepe paper, a cutter, two elastic bands, ribbon.

1. Cut in half the bottle with the cutter.
2. With glue, stick the crepe paper on the bottle.
3. Put the elastic bands on the bottle, one at the top and the other at the bottom.
4. Introduce your finger in the glue and expand it over one side of the stick.
5. Then, pull from the elastic bands and put and stick the twigs on the bottle.
6. Wait some time for the sticky glue to dry.
7. If you want, you can put a ribbon when it is dry.

Elisa Morán Y3

#### Instructions for making a money tree

You need:

A plastic bottle, newspaper, a cutter, white glue, tissue paper and plasticine.

1. Use newspaper to make the top of the tree.
2. Glue or cellotape to the lid of the bottle.
3. Cover everything with tissue paper and glue.
4. Leave to dry
5. Make gold coin shapes using yellow plasticine.
6. Ask an adult to cut a coin slit in the bottle.
7. Keep your coins inside.
